

Gebhardt International Cedar Homes Inc.

Quality Cedar Loghome Manufacturer

About us

Our company and our vision

Gebhardt International Cedar Homes Inc. is operating in the Loghome Business since 1994.

Hertha Gebhardt (Marketing) and Günther Gebhardt (President) lead the company, which originally started in Germany.

After increased demand for **Environmentally Friendly Cedar Loghomes**, we decided to establish and manufacture where the cedar is growing which is in **New Brunswick**, Canada on Dec 30, 1999.

Our company is engineered thoroughly to satisfy high demanding International clients. Therefore we can offer a number of significant combinations of special technical features.:

- **Finger-jointed Logwalls (or splinted butt-joints)**
- **The laminated log - is the aristocrat of log construction**
- **Self aligning corner notch (interlocking system)**
- **Vertical thru-bolt rods with 1000 lbs. compression springs**
- **Exclusive unique drip edge, extra long on each row of logs**
- **Triple tonque and groove, joint with emseal sealing tape**
- **Rough bucks frames for all Windows and Doors**

These excellent features enable us to give a **20 Year Warranty**, against air and water infiltration, for the laminated Log Walls only.

The company's Log Homes belong to the German thermic protection code (which is the strongest in the world) according to DIN 4108 (German Industrial Code). The thermic protection of our 152 mm thick cedar logs, are identical with 203 mm pine logs.
